Wow! Taos is on the map again! Chosen by the February issue of Sunset Magazine as THE cool vacation home place, charming, inviting, Taos is the place to invest.

Taos values continue to hold up in this depressed housing market and the vacation rental market has held. Of course we're seeing Californians and Texans continue to invest here - Taos is within driving distance of Texas and a short plane trip from California. But we continue to see folks from the northeast and southeast investing here, as well as lots of people from outside the US.

Thing about what Taos has to offer: the art scene is great year-round; we have world-class skiing all winter long; and you can't beat the hot air ballooning, hiking, biking and sight-seeing in the spring, summer and fall.

Now is the time to think about investing in real estate in Taos, while mortgage rates are low. We have just the perfect situation for you, whether you're looking for land, a condo or a single family home.
